

“Gender-based violence”

Gender-based violence refers to any type of harmful behaviour against a person or group of people because of their sex, gender, sexual orientation, or gender identity.

“Gender-based violence”

The Government of Canada defines gender-based violence as “violence based on gender norms and unequal power dynamics, perpetrated against someone based on their gender, gender expression, gender identity, or perceived gender. It takes many forms, including physical, economic, sexual, as well as emotional (psychological) abuse.”

Glossary of Terms

Background

The Glossary of Terms was created to promote a shared understanding of many common terms used to describe mental health challenges arising from exposure to potentially psychologically traumatic events and stressors.

The initial iteration of the glossary was intended to

1. Facilitate open discourse and conversations among the many partners and stakeholders at the National Conference on PTSD held in 2019; and,
2. Assist in developing the Federal Framework on PTSD. To date, Act C-211 stands as the only federal government Act that acknowledges the importance of work-related risk factors in the development of PTSD in certain professions.

COLLABORATING

The Glossary of Terms brings together a diverse, multi-institutional, pan-Canadian group of academics, clinicians, and policy makers. Together, we are working towards a broadly accepted set of terms for clinicians, scientists, policymakers, people with lived experience, and the general public.
